

www.FactoryNOW.com

FactoryNOW is a **subscription based**, remote monitoring and reporting system to collect data from machines, processes, and equipment, and report it to you via the World Wide Web.

- Collect Data from **YOUR** Machines, Processes, and Remote Locations 24x7
- Analyze and View Reports on the World Wide Web – using just a web browser
- Pay for it on a **Subscription Basis**, with little to **NO** capital investment!

Using existing technology imbedded in your equipment and processes, OR via our revolutionary **Portable Data Collector**, we monitor real time data from your machine or process, 24 hours a day.

We buffer that data, sending it through local internet data links - even wirelessly - to our Secure **Internet Data Center**. There, data from hundreds of remote sites is stored, archived, and processed, to provide timely information reporting valuable to your business.

!! YOUR CAPITAL INVESTMENT IN INFRASTRUCTURE CAN BE *ZERO !!

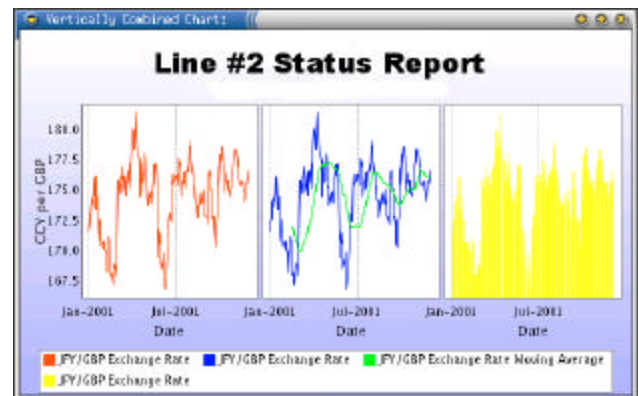

HOW? Because **We** maintain the infrastructure – you use **our** components and reporting tools to report your data via the web, practically any way that you want. We set up the system, configure your reports, and broadcast them to you on a customized web page, or periodically via email. There is **NO** setup/configuration effort necessary on your part, our help-desk staff configures the system for you.

YOU own your data. Its stored safely on our Secure Database Server in standard SQL format. We archive it for you, and send you optional backup CDs. You can download your own data from our secure server any time you desire., or access it remotely for use in your mission critical business applications.

Use FactoryNOW! services for:

- **SHIFT REPORTS**
- **TANK LEVEL MONITORING**
- **MACHINE DIAGNOSTICS**
- **MATERIAL SUPPLY/REPLENISHMENT**
- **PRODUCTION REPORTS**
- **ENERGY MONITORING**
- **DOWNTIME MONITORING**
- **EQUIPMENT PERFORMANCE VERIFICATION**

.....**PRACTICALLY ANY REMOTE DATA COLLECTION AND REPORTING SITUATION !**

Equipment OEMS: Remotely monitor your equipment during system installation and warranty period, for diagnostics and warranty support. What's **REALLY** happening at the customer site? Fetch trend data, error logs, and diagnostic information from your office.

Equipment Buyers: Verify performance data via the web, before the equipment ships from the OEM. Compare data in your plant versus test data from equipment runoff. Identify problems and inefficiencies in production processes.

Plant Engineers, Production, and Management

Instantly know the status of production and support equipment. Downtime, causes, productivity reports are available when you need them.

YOU CAN RENT A PORTABLE DATA LOGGER TODAY, AND VIEW COMPREHENSIVE STATISTICAL REPORTS ON THE INTERNET TOMORROW!

Safely, Securely, and Confidentially, with Global Access to the Information
